Oct 2021 - Jan 2022, Vancouver, CA

Capital University of Economics and Business | Master of Business Administration (MBA)

Sep 2009 – Jun 2012, Beijing, China

Peking Union Medical College | Biochemistry

Sep 1998 – Jun 2001, Beijing, China

PROJECTS

Zonama | Full Stack Developer [Live Demo](#)

Oct 2021 – Jan 2022, Freelancer

Zonama is my in-depended project, which is used NextJS, MongoDB cloud on AWS, Material UI, PayPal api, and deployed on Vercel. It is a full-functional application that can be used directly in real word for e-commerce business.

LoveShare | Full Stack Developer [Live Demo](#)

Mar 2022 – Apr 2022, Grouppers - Freelancer

Collaborate with other developers and build this app. We used both front end and back end tech, and Jira for this app. Our team also resolved collaboration challenge very well and delivered our project.

OTC-Blog | Full Stack Developer [Live Demo](#)

Nov 2022 – Jan 2022, Grouppers - Freelancer

This is a fully functional multi-purpose blog powered by React and Gatsby JS v3 and flexiBlog theme. It is also a server-side-render app that can automatically update.

RentAcar | Web Developer [Live Demo](#)

Nov 2022 – Jan 2022, Grouppers - Freelancer

Collaborate with UX team and build this app. We used typescript and tailwind css to build this fancy car rental landing page.

ReadRadio | Web Developer

Oct 2021 – Jan 2022, BrainStation Capstone Project

This is a live transcription radio station app supporting 76+ languages, saving notes and audio clips. The technologies include Speech Recognition, web stream, React, Node.js,
